NetSuite E-commerce

1. Why NetSuite E-commerce?

Why NetSuite E-Commerce?

A complete solution for fusing online stores with in-person sales and back office accounting software is NetSuite SuiteCommerce. A unified system called SuiteCommerce oversees all business dealings and client interactions on the Web, mobile, social, and offline. With multilingual, multinational, and multibrand online stores that can all be operated and controlled from a single NetSuite system, NetSuite enables you to perform e-commerce around the globe. This integrates e-commerce, POS, inventory and order management, marketing, customer support, and financials, providing real-time visibility through a single data source for well-informed, timely business choices, eliminating the disparities resulting from multiple systems. It enables retailers to attract more visitors to their online stores, turn those visitors into paying consumers, and increase online sales.
